

**PATTONVILLE SCHOOL DISTRICT**

**EPS Code: FB**

**District Code: New**

### **FACILITIES PLANNING**

The Board shall review procedures and recommendations for periodically updating the long-range school plant program. This will provide guidance for capital outlay expenditures, and assure that the School District has well-planned school buildings at proper locations when needed and at reasonable costs. The superintendent shall report annually to the Board of Education the status of facilities needed, based on enrollment projections and other factors.

Planning for school buildings may be initiated by the Board members upon their recognition of the need, or possibly upon request by the staff, patrons and/or the superintendent. Principals and their staffs shall be consulted from the sketch plan stage until the final layout is determined. Consultants shall be used both at the sketch plan stage and for the final plans and specifications. This will ensure that the proposed building complies with the requirements of the school building code and all fire, safety, and health regulations for public buildings in Missouri.
