### **PARENT CONFERENCES**

The Board supports the value of parent conferences by including in the school calendar scheduled days for parent-teacher conferences. Teachers should also arrange conferences with parents/guardians of pupils as often as the teacher and parent/guardians deem necessary. Such conferences may be held in addition to the scheduled conference days. However, teachers shall schedule conferences at a mutually convenient time for both the parent/ guardian and themselves.

The primary purpose of the parent conference is to aid both the teacher and the parent in providing the best possible education for the child. Conferences may include personal visits as well as telephone consultation, and should be used, not only in communicating problem areas, but to report excellence and commendations for achievement, as well.

All conferences, regardless of frequency or type, should foster cooperation between the home and school.
