

### **EDUCATIONAL AGENCY RELATIONS GOALS**

It is the general goal of the District to support the educational endeavors of other institutions and agencies whose goals are compatible with those of the District.

In its relationship with other educational institutions and agencies, the School District will strive to act as a partner and colleague in the following ways:

1. Post-High School Institutions

Within its resources and according to abilities and efforts of each individual student, the School District will prepare students for successful experiences in post-high school institutions.

To the extent appropriate and applicable, the School District will utilize the resources of post-high school institutions for the in-service development of the professional staff.

The School District will cooperate with post-high school institutions in selected areas of research and experimentation which have the potential to increase the effectiveness of teacher preparation, staff development and/or which directly improve the local instructional program.

The School District will share in the responsibility for preparation of student teachers and other school workers with institutions of higher education.

2. Other School Districts

The School District will work cooperatively with other school districts in programs which can be more efficiently administered or improved through cooperation than through acting alone.

The School District will assume its share of responsibility for improving the climate for education in the state and nation, particularly with reference to expanding the fiscal base, providing for efficient expenditures of funds, and bringing about state or federal legislation, which improves education or contributes to District goals.

3. Governmental and Education Agencies and Organizations

The School District will cooperate with professional educational agencies and governmental organizations which are important forces for the improvement of education.

Adopted: June 30, 1981
